

# Assignment 1: Introduction

Shirley Fontanie

## OVERVIEW

This exercise accompanies the introductory material in Environmental Data Analytics.

## Directions

1. Change “Student Name” on line 3 (above) with your name.
2. Work through the steps, **creating code and output** that fulfill each instruction.
3. Be sure to **answer the questions** in this assignment document.
4. When you have completed the assignment, **Knit** the text and code into a single PDF file.
5. After Knitting, submit the completed exercise (PDF file) to the dropbox in Sakai. Add your last name into the file name (e.g., “Lima\_A01\_Introduction.Rmd”) prior to submission.

The completed exercise is due on <>.

## 1) Discussion Questions

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: In a classroom setting I have used R to map, but have forgotten that knowledge. I have no prior experience with data analytics and Git.

2. Are there any components of the course about which you feel confident?

Answer: Sadly, no. But I like the pace of the weekly assignments and I know that I can only grow from practice.

3. Are there any components of the course about which you feel apprehensive?

Answer: Remembering the order of steps, making careless mistakes, and forgetting to save my work.

## 2) GitHub

Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file.
